

W06-1.5x2500 Hand Folding machine

The hand folder is the culmination of many years experience on the development, manufacture and application of hand bending machine. This style of brake incorporates all the outstanding features of various hand brake. Particularly, it has removable, dividural upper mould for bending different length. This machine can be used to form a box and pan having four sides and a bottom form one plate metal sheet. In addition, a narrow return flange on the top of a box can be made as in the manufacture of electric switch boxes. With the full length upper mould in place, the electronic switch boxes, fuse boxes, etc. They are in great demand both at home and abroad due to small size, energy-saving, high efficiency and wide usage.

Specification/Parameter	W06-2.x1320	W06-2.x2000	W06-1.5x2500
Bending length(mm)	1320	2000	25000
Folding thickness for mild steel(mm)	2	2	1.5
Overall Dimensions(mm)	1750x600x1200	2150x600x1200	3000x750x1100
Net Weight(kg)	750	950	1350
