

Hydraulic Folding-W62K

FEATURES:

The machine tool is full welded-steel plate construction.

After vibration aging treatment, the deformation is minor so that the accuracy can be ensured.

Machine is hydraulically powered. It is low energy consumption, easy to maintenance and durable in use.

Upper acting die is sub-portfolio with the open height up to 110mm and suitable for producing disk, box like workpieces.

The bending angle and back gauge is controlled by numerical control system, rapidly and accurately.
