

BENDING PRESS

Feature:

This kind of hydraulic press(bending machine) are used for assembling,dismantling,alignment,calendaring,tension,bending and punching

The machine supplied oil by italy CNK and CBZ pump,it could save 60% energy compared with the traditional model.the efficiency increased to 2-3 times.

it takes the advantages of small volume,high pressure,simple structure and light weight.

the worktable could up-down movement,easy to operation.

FEATURES:

- With braking function
- Adjustable work table
- Extremely rigid, torsion-proof steel weldment
- Reliable, highly accurate hydraulic system
- Hydraulic presses include replaceable top tools
- Table can be lifted through a chain driven by the main cylinder
