

3MB9808 VERTICAL CYLINDER HONING MACHINE

Application and features:

The machine is mainly used for honing engine cylinder of automobiles motor cycles cars and tractors and also for making other machine tools.

- ※ The machine have compact frame, small volume.
- ※ The machine can operate easily, having manual operator and motor operator.
- ※ When the main spindle moving up and down, recision of switch direction less than 0.4mm.
- ※ The main spindle moving up and down, adjust easily.
- ※ Good rigidity and amount of cutting.

No	Item	Unit	Technical Specification
1	Diameter of hold honed	mm	40-82
2	Max depth of hole honed	mm	200
3	Spindle speed(2spets)	mm	200;280
4	Spindle Stork(2spets)	a/min	19;27
5	Spindle vertical travel	mm	70
6	Power of main motor	Kw	0.55
7	Power of cooling pump motor	Kw	0.09
8	Machine working table dimensions LxW	mm	600x380
9	Overall dimensions LxWxH	mm	600x850x1300
10	Machine Weight	Kg	350
