

Con Rod Bush Boring Machine T8216

T8216 Con-rod bush boring machine

This boring machine is used to bore link bearing hole with diesel and gasoline engineering automobile tractor etc. (including copper quill and link tile). Customer carry also a little boring to link shaft seat. When filling special fixture on the boring machine, it can finish precision boring of some small parts with piston pin hole, gas pump bearing hole and valve seat hole etc.

Diameter range of boring hole	15-150mm
Centre distance of link two hole	85-600mm
Longitudinal travel of worktable	320mm
Spindle speed (6 steps)	140, 215, 355m 550, 785, 1200 rpm
Transverse adjusting amount of fixture	80mm
Feeding speed of worktable	16-250mm/min
Traveling speed of working	1800mm/min
Diameter of boring bar (4 kinds)	14, 29, 8, 59mm
Main motor power	0.85/1.1kw
Motor power of oil pump	0.55kw
Boring machine appearance size	1300x860x1760mm
Net weight	800kg
