

## MG16 Cylinder boring machine

### MG16 Cylinder boring machine

The machine is mainly used for honing the hole of engine cylinder body or cylinder sleeve of automobiles, tractors and so on, and also for honing other mechanical parts hole.

The honing head moves up or down controlled hydraulically, which speed can be adjusted steplessly.

The honing head is mechanically-driven to rotate, safely and reliably.

Honing Diameter	Φ45-Φ160mm
Max Travel Of Spindle	320mm
Motor Power	1.1KW
Overall Dimensions	1400×920×2300mm
Packing Dimensions	1480×1080×2100mm
Net/Gross Weight	980/1160kg
