

## SBM100 Cylinder Boring Machine

### Cylinder Boring Machine SBM100

The boring machine is mainly used for reborring engine cylinders of automobiles.

1. Reliable performance,widely use,processing accuracy high productivity
- 2.Easy and flexible operation
- 3.Good rigidity,amount of cutting

Model	SBM100
Boring diameter	36~100mm
Max. boring depth	220mm
Steps of spindle speed	2 steps
Spindle speed	200~ 400 rpm
Feed of speed	0.076mm/rev
Spindle return mode	Manual
Main motor power	0.37/0.25KW
Motor Speed	1440~ 2880rpm
Frequency	60 /50Hz
Weight	122 Kg
Overall dimensions	720*390*1700mm
