

T8115x16 CYLINDER BODY BUSHING BORING MACHINE

T8115Bx16 cylinder body bushing boring machines which were developed in our factory. They can be used for boring masrer bushing and bushing of engine & generator's cylinder bodier in automobiles and ships etc.

In order to reduce auxiliary manhous and labour intensity and guarantee machining quality, accessories for centering, sectifying tool, measuring inner diameter, boring rod bracket, tool holder to increase dianeter, boring tool microadjuster and for distance tool sectifying device can be provided with the main machine.

MAIN SPECIFICATION

Bored hole diameter	(T8115Bx16) $\Phi 36-\Phi 150\text{mm}$
Max.length of cylinder body	(T8115Bx16) 1600mm
Main shaft max elongation	300mm
Main shaft rotating speed	210-945r/min 【6class】
Boring rod feed ruantity	0.044,0.167mm/rad
Motor power	0.75/1.1KW
Dimensions(LxWxH)	T8115Bx16 3510x650x1410
