

## T8120AX20 Cylinder Body Bush Boring Machine

Model T8120AX20 cylinder body bushing boring machines can be used for boring master bushing and bushing engine and generator's cylinder bodies in automobiles, tractors and ships etc.

In order to reduce auxiliary man hours and labor intensity and guarantee machining quality, accessories for centering, rectifying tool, measuring inner diameter, boring rod bracket, tool holder to increase diameter, boring tool micro adjuster and for distance tool rectifying device can be provided with the main machine.

Mode	T8120AX20
Range of boring dia.	28-225mm
Max. length of cylinder body to be bored	2250mm
Max. extending length of spindle	300mm
Spindle heads cross movement	60mm
Spindle speeds	I: 30-150rpm II: 93-467rpm
Spindle feeds	0.43, 0.085, 0.125 mm/r
Lifting range of spindle box in relation to machine plane	470-840mm
Motor power	1.5kw
Dimension(LxWxH)	4382x650x1420mm
