

T8466 Brake drum lathe

This equipment is a kind of lathe. It can fulfill the reparation of the brake drum and shoe of automobiles from medium trucks and heavy trucks. This equipment aim at heavy and deep characteristic of brake drum, fit up with out-board supporter and crane, enhance the rigidity for feed system and tool system. Rough and accuracy two feeding capacity, improve the processing efficiency.

This equipment meets the requirement of State Standard(GB12064), Brake Drum Cutting Machine.

Specification	T8466
Processing dia. Of drums	260-660mm
Processing depth of drums	260mm
Spindle speeds (3 steps)	30, 50, 85 rpm
Feed rate (2 steps)	0.15, 0.30 mm/r
Drive motor	1.1 kw
