

3M9816 Cylinder honing machine

Cylinder honing machine 3M9816

This machine is mainly used for honing cylinder hole of gas engine of motorcar, tractor and so on, as well as honing holes of other machine part. The honing head is moved up/down by fluid drive and is with stepless speed change. The rotatory movement of honing head driven by mechanical speed change is safe and reliable.

Main Specifications	3M9816
Boring(grinding) Diameter mm	45-160
Max. Boring(grinding) Depth mm	320
Spindle Speed r/min	125.250
Reciprocating Speed of Honing Head m/min	0-10
Machine Power kw	1.1 / 1.1
Overall Dimensions mm	1240 x 850 x 2310
Packing Dimensions mm	1310 x 1010 x 2100
N.W/G.W kg	940 / 1130
