

## VS90 Valve seat and guide machine

## Features:

- 1. Featuring the new generation of valve seat boring. Provides more than a 30% decrease of cutting forces during Machining. 2. Angular accuracy within  $\pm 0.5$  degree guaranteed on multi-angle cutter.
- 3. Machining capacity from 0.55"/ 14 mm to 3.6 "/ 90 mm.
- 4.Modern modular machine bed design for improved rigidity. Computer enhanced static and dynamic characteristics provide 5.The latest in machining technology.
- 6.New improved lighting system.
- 7. New table bars with pnevmatic locking.
- 8. Fully integrated spindle motor, Infinitely variable speed 100 to 1200 RPM, with sensorless Vector Flux Control. Forward and reverse
- 9.directions. Extremely broad torque ratings from lowest RPM with constant torque spindle rotation. Digital RPM readout for accurate speed setting.
- 10.Patented Workhead with triple Air-Float Automatic Centering System and built-in spindle motor. Greatly reduces the number of free-floating parts during the centering sequence. Results in minimal work-head inertia and maximal floatation for unmatched centering sensitivity.
- 11. High quality smooth, 3 tone paint work.
